Our Senses

Write about one of the senses we have

***How many senses do we have?**

***What are the five senses?**

***Select one sense. What are the organ that we use?**

Draw this organ

- Humans have got basic five senses.
They are senses of touch, sight, hearing, smell and taste. The sense of sight is the ability to see objects around us.
It is also the ability to perceive colour, brightness and depth. We use our eyes to see a friend, read a book, or watch a movie.
We use it also to check for cars, making sure it's safe to cross the street.
We use our sense of sight to determine if it's day or night.
Therefore, we have to keep sharp objects away from our eyes and we shouldn't watch T.V too much.

Draw a map for Egypt to show the twoseparate parts?

- Ancient Egypt was one of the greatest and most powerful civilizations in the history of the world. It lasted for over 3000 years from 3150 BC to 30 BC. The civilization of ancient Egypt was located along the Nile River. Old Egypt was divided into two main regions, Upper and Lower Egypt. Lower Egypt was in the north and contained the Nile Delta, while Upper Egypt contained areas to the south. Upper and Lower Egypt were united by Menes Narmer who managed to join Lower and Upper Egypt into a single kingdom about 3000 BC.

***What it is famous for?**

Draw something famous about this governorate.

My family and I want to visit a governorate in Egypt, so we decided to visit Cairo, which is the capital of Egypt. It is located on the banks and islands of the Nile River in the north of Egypt. My family and I can go there by train as it is faster than a car. Cairo is famous for a lot of ancient places like the pyramids , the sphinx, the Egyptian Museum, Old Cairo and The Khan elKhalili Bazaar. Despite these historical places, there are a lot of modern places like Egypt Mall. We can also have a trip on the River Nile by cruise boats. It is very relaxing and marvelous, so I can't wait to go there!
